iWATCH ARMY

iREPORT **i KEEP US SAFE**

Empowering an informed, involved, and observant citizenry

Individual members of our communities are best positioned to observe the initial indicators of illicit activity. It is critical that these individuals are willing and able to inform law enforcement and security communities of suspicious or unusual activity. We must seek to encourage the development of social networks that derive from positive and productive relationships among our law enforcement and security communities and members of those communities at unique risk of exploitation.

National Strategy for Countering Biological Threats, Nov 2009

A Simple Observation

A Single Report can lead to actions that may STOP bioterrorism

THINK ABOUT THE POWER OF THAT. THE POWER OF iWATCH.

Biosecurity protects, controls, and provides accountability for biological agents and toxins to prevent unauthorized possession, loss, theft, misuse, diversion or intentional release. Report suspicious activity or behavior.

See Something Say Something

Always Ready, Always Alert

Because someone is depending on you
