1. PURPOSE: To establish limits on the presence and conduct of military personnel and accompanying civilian employees and contractors of RTUs and augmentation Soldiers (hereinafter referred to collectively as RTU personnel) in the cantonment area of the National Training Center (NTC) and Fort Irwin because of its limited size and capacity. This policy applies whether Soldiers are at the NTC and Fort Irwin for a training rotation or for the Leader Training Program.

3. PUNITIVE POLICY: Violations of this policy may result in punishment of Service Members under the Uniform Code of Military Justice and adverse administrative action against DoD civilian employees and contractors.

5. POLICY: The NTC and Fort Irwin is committed to providing RTUs with the best combat training in the world, and, as our guests, access to our community services and facilities. However, Fort Irwin is a small and isolated installation and its cantonment area facilities are staffed, stocked, resourced, and funded merely to meet the requirements of the assigned Soldier and Family population. Because of this, we must put restrictions in place both for the safety of the RTU Soldiers as well as the safety and benefit of our resident community.

a. FACILITIES. The Rotational Unit Bivouac Area (RUBA) is designed to meet the needs of the RTU personnel transitioning in and out of the training area. For safety reasons, use of the RUBA is for official business only, and is off-limits to all Family
