

Scorpion 27 – Wolf Web Page November 2001

Issue: PCC/PCIs

Discussion: Task Forces repeatedly fail to follow established PCC/PCIs as evidenced by their repeated failure to arrive on the battlefield without the proper equipment on hand. This is in part due to a lack of training and a lack of a standard format checklist in the Fire Support SOP that addresses the who, what, when, where, and why these checks and inspections are to occur.

Recommendation: Develop a standard format checklist and definition of who, what, when, where, and why these checks are to be performed. Second, the FSE should verify with their own checklist that these checks and inspections have been performed prior to mission execution. The FSO should confirm with the FSNCO that all checks are complete before the mission.
